

# Hi! We are Hey Now

We interact with your customers through solutions based on generative artificial intelligence (AI). We respond in real time and understand text, audio and images.

## Manage your customers' data

Thanks to our own API, you can access all the information we collect from your customers. In addition, you can design and schedule reports as you wish.

## Take advantage of AI's potential

We work with generative AI based on large linguistic models, which allows users to converse intuitively with your brand, both with text and voice as well as with images.

## We can run on the world's leading platforms

## Why choose Hey Now?

- Quick and easy implementation (no-code and pre-built-ins)
- Immediacy and availability (7x24)
- Self-service for your users
- Assistance from the beginning (consultative selling)
- Multiple channels and formats
- Reports according to your interests
- Detection of sentiments and intentions
- Ability to assist thousands of customers at the same time
- Delivery of outbound messages

## How we can help

### Marketing, e-commerce and sales

Show your catalog, send promotions, sell consumer credits, allow your customers to buy directly from the chat and more.

### Customer management

Answer frequently asked questions, schedule appointments, validate identity and register customers, among others.

### Coordination and reservations

Facilitate self-service for your users, manage reservations and claims, coordinate services and everything you can imagine.
